

DK IMOVE CL

MOVING ON

DK Imove CL stands out in the Clearfield sector for its combination of rapid autumn and fast spring development, giving the greatest pest and weather tolerance.

Good resistance to verticillium adds to its impressive foliar disease and other agronomic ratings.

VITAL STATISTICS

| | |
|----------------------------|-----------|
| GROSS OUTPUT | 5.30 t/ha |
| OIL CONTENT | 45.3% |
| RESISTANCE TO LODGING | 8 |
| STEM STIFFNESS | 7 |
| HEIGHT | 3 |
| EARLINESS AT REGROWTH | EARLY |
| EARLINESS OF FLOWERING | 6 |
| EARLINESS OF MATURITY | 7 |
| STEM CANKER RESISTANCE | 8 |
| LIGHT LEAF SPOT RESISTANCE | 6 |
| TuYV RESISTANCE | - |
| POD SHATTER RESISTANCE | R |

AHDB RL Candidate Data 2021 & DEKALB
Replicated Trials 2022

MAIN ATTRIBUTES

- Moving both performance and agronomy on from previous Clearfield benchmarks.
- Rapid but not over-fast autumn development to get away from autumn challenges with the least risk of excessive pre-winter canopy growth.
- Especially fast spring regrowth for the most reliable compensation for winter weather and pest damage.
- Good light leaf spot and stem canker resistance and strong standing power for the greatest ease of management.
- Clear resistance to verticillium with a yield identical to the most resistant standard in national stem health trials.
- Original Dekalb pod shatter resistance, maximising combining flexibility while minimising seed losses in the run-up to and at harvest.

DK IMOVE CL

MOVING ON

KEY TRAITS

VIGOROUS ESTABLISHMENT

Robust initial root and shoot growth for the most reliable and even establishment.

RAPID AUTUMN DEVELOPMENT

Faster-than-average development for the most rapid growth away from flea beetles and other autumn challenges.

DOUBLE PHOMA RESISTANCE

RLM7 supported by polygenic resistance for the most durable phoma/stem canker protection and greatest spraying economy and flexibility.

CLEARFIELD

Conventionally-bred resistance to Clearfield™ herbicides for the most effective control of cruciferous weeds and non-Clearfield OSR volunteers.

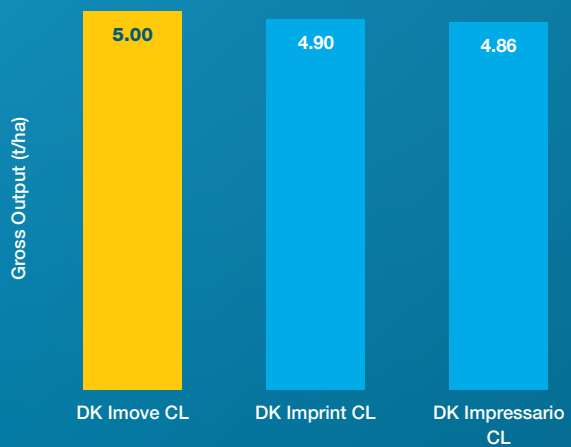

POD SHATTER RESISTANCE

Pioneering genetic resistance to pod shattering for the least seed shedding up to and at harvest and the greatest flexibility in harvest timing.

DK Imove CL is the natural successor to DK Imprint CL and DK Impresario CL for growers who value consistency of performance as much as the highest levels of output.
