## Tank-mix sheet

Please note that physical compatibilities may not be approved tank-mixes. The tests do not check for any adverse crop phytotoxicity or for the biological efficacy of the individual components when applied in a tank-mix. Bayer Crop Science gives no warranty and accepts no liability in respect of physical compatibilities; therefore, use is at grower's own risk.

Always check individual product labels for any possible restrictions before making a tank-mix recommendation.

## For best results, Monolith + biopower should be applied alone.

In soft crops avoid the use of tank-mix partners with the potential to cause crop damage when applied in tank-mix with an adjuvant. In particular, tank-mixes with EC fungicide formulations and HBN products (e.g. Buctril) may result in transitory adverse crop effects.

Add the recommended quantity of Monolith to the spray tank half-filled with the required quantity of clean water. Add the remainder of the water with the sprayer agitation system in operation. Always maintain agitation during mixing and loading and until spraying is complete. Spray immediately.

Do not leave the sprayer standing with chemical in it. Always add biopower to the spray tank last.

Bayer Crop Science will support the physical compatibility of tank-mixes of Monolith + biopower with only ONE of the products listed below:

Fungicides		
Amistar	Fandango	Talius
Ascra <sub>Xpro</sub>	Firefly <sup>155</sup>	Variano <sub>xpro</sub>
Aviator <sup>235</sup> <sub>Xpro</sub>	Flexity	Zephyr
Boogie® <sub>Xpro</sub> Plus	Helix	Mobius
Proline <sup>275</sup>	Jaunt	

Herbicides		
Chekker	Liberator (Until 31st March in the year of harvest)	Sekator OD
Eagle	mecoprop-p*	
Herold (Until 31st March in the year of harvest)	Regatta (Until 31st March in the year of harvest)	

<sup>\*</sup> Approved formulations

PGRs		
Chlormequat		

In addition, Bayer Crop Science will support the mixture of one fungicide from the supported list above with one of the following ALS containing herbicide in addition to biopower. **Three-way tank-mixes with chlormequat or non-ALS herbicides are not supported.** 

Supported Herbicides in three-way tank-mix		
Chekker	Eagle	Sekator OD

Recent Changes	
24/11/17	Addition of Chlormequat and fluroxpyr.
24/11/17	3 way tank mix support included
25/08/20	Fortress, Fluoxypyr, Buctril removed
15/10/21	Capalo, Ceando and Epoxiconazole formulations removed
